OperationsIP

OIP-PRD-003 · Version 1.0 · Effective 1 December 2026

Integrations and Payments Policy

Businesses can connect their own systems, such as Xero, QuickBooks, Stripe and Square, as those integrations are released. They connect them themselves, in Settings.

Policy · Product policies

Legal and standards basis

- PCI DSS
- Privacy Act 1988 (Cth)
- GDPR

1. How connections work

- The Owner or an Admin connects an account using that provider's own sign-in (OAuth). We never see the password
- Connection keys are stored on the server, encrypted, and never shown in the app
- A business can disconnect at any time. We then delete the keys

2. Payment links

Businesses can create payment links for their own customers using their own Stripe or Square account. Money goes straight to the business. OperationsIP doesn't hold the funds or see card numbers.

3. Responsibility

Each connected provider is the business's own provider, under the business's own agreement. The business is responsible for the data it chooses to send to them.
